02. ANJ Chatbot - Mood-Aware AI Companion Individual

AI-powered mood-aware chatbot delivering personalized conversational experiences through dynamic interfaces and real-time AI responses.

Key Contributions:

- Developed a mood-aware UI with dynamic themes and personalized interactions
- Integrated Groq Cloud and Llama 3.3 via Vercel Edge Functions for real-time AI responses
- Implemented mindfulness micro-goals, drawing tools, and interactive animations
- Built a secure serverless architecture for API-key handling and scalable deployment

Tech: React.js, TypeScript, Vite, Vercel Edge Functions, Groq Cloud, Llama 3.3

03. AI-Powered Smart Parking System

Group | 05/2024 - 05/2025

First Year Hardware Project

Microcontroller-based hardware and software project combining computer vision, IoT, and full-stack development for automated parking management.

Key Contributions:

- Co-developed an AI-powered smart parking system using computer vision, IoT, and full-stack technologies
- Built an ANPR system using YOLOv8, Roboflow, EasyOCR, and OpenAI Vision API
- Developed real-time parking and booking with live slots, Stripe payments, and SMS confirmations
- Integrated ESP32-based P10 displays, alarms, and alerts for unauthorized vehicles

Tech: Python, React.js, Node.js, Flask, MongoDB, YOLOv8, OpenCV, ESP32
